

Pre-Report race 2 in Liège 2019 - „Hobby 2000 / Slot 4000“

Next weekend, we will have the season final race of the 5th "LMP Pro Series" season. Since the beginning we drive this finale on "Treveris-Ring" in Trier. The track is a challenge for drivers and technology. The track conditions last year were very consistent and the track-grip on a great level. For this year the track will be prepared in the same way.

After a diversified season with various teams on podium, we expect an equally exciting final race. Next to the race result the teams will try to collect as many points as possible for the championship. For the race we have the inscription from 19 teams with more than 40 drivers.

As "last minute" entrance, "RCT2" want to drive their first "LMP Pro Series" race with Marc and Miguel. We are happy to welcome "Projekt LMP Bavaria" in our community. Günter, Simon and Michael want to make their first experiences for the 2020 season. "TBC Racing" and "Damstredet Racing" are also back for the final race in Trier. We are looking forward to the further development of these two Norwegian teams. "Slot4000 Dephi" drove last year for the first time on this track. They will try to implement the knowledge from this experience and leave the last position. Henny and Johannes will arrive late this time. To compensate, the plans for 2020 at "Slotracing Mülheim2" are nearly done. It is rumored, the two have strengthened the team with a 3rd driver. "el.DudeFa.R.T." show this year their strongest "LMP Pro Series" season. If the setup will fit and the technique holds, a top ten position should be again possible for Bert and Gabe. For our friends from Finland from "LemUa Racing" it can only run better than in Liège. Last but not least, "SRCB" showed a clear upward trend. In the old line-up, they slowly went back to old successes. The same applies to "Hobby2000 Junior" and "RCT1". Almost everything is possible with a reliable car and a suitable setup. "DSCA" is the surprise of this season. Everyone is curious, will this Newcomer team able to show again such a great performance? With "Sloefspeed2" and "MAC Racing by Joker" we have two teams, for which a Top6 ranking is possible. For extra tension both teams are only 0.7 points apart in the championship. For "GP Slotracing" the final driver lineup is not completely clear. After Reinforced with racecenter chief Martin they should be able to reach a great result.

Let us look for the absolute favorite teams. The local team "Jäger Team" is a clear victory candidate. After all, Daniel, Joachim and Yannick were already able to achieve top results on foreign tracks with minimal practice. Also, "Sloefspeed" is very strong this season. Especially Björn loves the "Treveris-Ring" and is able to fly on this track. "Hobby2000 by D&G" drove their first "LMP Pro Series" victory. Of course they would like to repeat this. As a favorite for victory never forget "Plastikquäler". The strong record of this team show 10 race victories out of 14 "LMP Pro Series" races.

The official time schedule is valid and can be found on our homepage under "documents". Nevertheless, at 8 p.m. all cars have to be ready in the parc ferme. After material handout and warm-up the technical inspection follows. Please provide the filled out "technical inspection" sheet to quicken the technical inspection. As mentioned in the FAQ, the DoSlot 27Shore rear wheels will be given out with a diameter of 27,3mm with a tolerance of +0,1mm. All JK Retro Hawk motors are carefully pre-selected and are equal as possible. After the race, rear wheels and motors are property of the teams.

We are looking forward to a great weekend with the entire "LMP Pro Series" community. See you all soon for the final „LMP Pro Series“ race 2019.

As usual, we run a facebook liveticker during the event, which can be seen even without Facebook account under: <https://www.facebook.com/lmpproseriesliveticker>
